

THE CLIENT SIDE OF QSME

Priced once. Tendered from the same lines. Built from the same record.

Feasibility, estimate, tender, contract, programme, site and payments in one project record.

- ✓ **Search the address.** Boundary, area and council for any NZ address; zone, overlays, what the site would require and a rough feasibility for Auckland sections.
- ✓ **Price the job in one sheet.** A schedule of quantities with your own columns and formulas, Excel in and out, AI drafting the unpriced lines for your review.
- ✓ **Cut tenders from it.** Every bidder prices the same lines and never sees your rates or budget. Bids compared as totals, excl. and incl. GST.
- ✓ **Award in one click.** The winning bid becomes the contract, milestones and retention, signed from a link.
- ✓ **Run the site and the money.** QR sign-in, daily log, a programme a lender can read, milestones paid on proof of work, the CCC pack in one zip.

Bring a real package. We'll cut the tender together in 30 minutes.

QSME is a New Zealand construction platform. Bids are compared as totals; each bid opens to its own lines. Full site research is Auckland first. QSME keeps the record of payments and never holds the money. Photo illustrative.
